10 A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

Growth in Chongqing's GDP continued to remain strong for the 1st quarter of 2011. In the latest GDP figures released by Chongqing Statistics Bureau and NSB (National Statistics Bureau), Chongqing's 1Q 2011 GDP was RMB 206.1 billion, an increase of 16.3% year on year. This strong growth rate places Chongqing third in ranking at the national level and the 2nd fastest growing city in Western China.

The Western China commercial property markets continued its strong growth momentum from last quarter. Quoting from the latest CBRE Property report "Office, retail and industrial sectors were underpinned by strong demand from both corporate expansion and the growing affluence of the local people, hence showed a strong sign of flight to quality as well as rising rents and prices." With the further establishment of the Liangjiang New Area and the favorable "Go West" policies, we continue to see numerous Fortune 500 companies as well as both domestic and international financial institutions such as ANZ, Citibank and Deutsche Bank setting up branches in Chongqing, should create a strong appetite for prime office spaces, thereby pushing both sales prices and rental rates higher.

Chongqing Commerce Commission announced that total retail sales of the consumer goods in Chongqing for 1Q 2011 reached RMB 83.33 billion, an increase of 17.8% compared with the same period in 2010. This robust growth ranks Chongqing 2nd in China, trailing Tianjin by only 0.1 percentage point with 17.9%. The volume of the wholesale and retail enterprises has strengthened significantly, increasing by an significant 41.8% to RMB 156.62 billion.

Since the beginning of 2011, the People's Bank of China (PBOC) has increased the required reserve ratio of the country's lender 4 times, with the latest being 50 basis points on April 21. The latest move would require China's financial institutions to lock up a record high of 20.5 percent of their deposits as reserves. PBOC has also raised the benchmark interest rates twice in 2011 with the latest one-year loan interest rate reaching 6.31 percent. These measures are put in place to curb the high inflation rate and discourage residential property speculation.

Given that the Group is focused on development of commercial properties and our clients are primarily corporations, the Group believes that these trends will have significant beneficial impact to our segment of the market despite further credit tightening by PBOC.

Barring any unforeseen circumstances, the Group expects to remains profitable in 2011.
