Earnings per ordinary share equals to the Group's profit for the financial periods attributable to the shareholders of the Company divided by the weighted average number of ordinary shares issued during the period under review.

Diluted earnings per ordinary share is calculated based on the similar basis as the earnings per share, except that the weighted average number of ordinary shares outstanding are adjusted for the effects of all dilutive potential ordinary shares. The Company has one category of dilutive potential ordinary shares: perpetual convertible securities, as of 30 Sep 2016.

Share options under the Ying Li ESOE are anti- dilutive as the average market price of ordinary shares during the period exceeds the exercise price of the options.

Performance shares under the Ying Li PSP are treated as contingently issuable shares because their issue is contingent upon satisfying specified conditions in addition to the passage of time. Contingently issuable shares are treated as outstanding and included in the calculation of diluted earnings per share if the conditions are satisfied (i.e. the events have occurred).

The Perpetual Convertible Securities is anti-dilutive as its interest per ordinary share obtainable on conversion exceeds basic earnings per share.

STATEMENT OF COMPREHENSIVE INCOME

Due to the nature of the industry that the Company operates in, recognition of revenue from the sale of properties is driven by project hand-over. Consequently, quarterly results may not be a good indication of profitability trend.

For the three months and quarter ended 31 March 2017

Revenue of the Group from the Sale of Properties increased by RMB112.9 million (307.4%) to RMB149.7 million as compared with 1QFY2016. The increase was a combination of continue handover of the residential units at San Ya Wan Phase 2 project, bespoke units at Ying Li International Electrical and Hardware Centre ("Ying Li IEC") Phase 1A and other properties.

Rental income decreased by RMB2.1 million (3.9%) as compared to the same period of last year. The decrease mainly due to the introduction of VAT* regime in China in May 2016, and loss of some rental income due to some properties being sold to tenants.

* With effect from 1 May 2016, Value Added Tax ("VAT") will be imposed on revenue received from customers in place of business tax. Revenue received will be deemed to be inclusive of VAT and the tax will be deducted directly from revenue and paid to the tax authorities.

STATEMENT OF FINANCIAL POSITION

Total Assets of the Group decreased by RMB163.0 million to RMB11.7 billion during the quarter mainly due to a decrease in cash and cash equivalents of RMB136.6 million mainly due to the repayment of loans.

The Group's total liabilities decreased by RMB133.4 million to RMB6.7 billion during the period under review. The decrease in liabilities was mainly due to reduction in borrowings amounting to RMB104.3 million due to loan repayment combined with a decrease in trade and other payables of RMB26.5 million arising from a decrease in advances received from customers as some pre-sales units were handed over.

The Group's total equity decreased by RMB29.6 million to RMB5,032.4 million during the period under review, mainly due to a decrease in the Exchange fluctuation reserve because of RMB devalued against SGD in 1QFY2017. The Exchange fluctuation reserve mainly comprises cumulative unrealised exchange gains/losses arising from the translation of the financial statements of the entities where the functional currency differs from the presentation currency which is the Chinese Yuan ("RMB").

STATEMENT OF CASH FLOW

The decrease in unrestricted cash and cash equivalent of RMB30.0 million for the quarter under review was mainly due to:

- i) net cash outflow of RMB37.3 million from operating activities; and
- ii) net cash inflow of RMB7.4 million from financing activities.

The net cash outflow from operating activities of RMB37.3 million was mainly attributable to cash generated from operating profit of RMB31.5 million and a decrease in trade and other receivables of RMB31.4 million mainly due to collection of outstanding sums on contracted pre-sales and refund of deposits previously placed with a financial institution. This was off-set by i) a decrease in trade and other payables of RMB61.4 million mainly due to the payment made to suppliers and transfers of amounts received in advance from customers to revenue as some pre-sales units were handed over; ii) increase in development costs amounting to RMB11.6 million incurred mainly on the ongoing construction of the Ying Li Financial Street project and the Ying Li International Electrical and Hardware Centre; and iii) net interest and income tax paid of RMB27.2 million.

Net cash from financing activities of RMB7.4 million includes: (i) increase in borrowing by RMB50 million to fund the construction of the Group's ongoing projects; ii) release of cash collaterals that were previously pledged upon loan repayment amounting to RMB106.3 million; and iii) repayment of borrowings amounting to RMB148.9 million.

The financial sector continued to be the key driver of demand while landmark buildings were highly sought after in the quarter. As the preferred location for MNCs, office demand in Jiefangbei CBD remained healthy and the average office rental (Grade A and Non-Grade A offices) remained resilient at RMB92.7 per sqm per month as compared to the average office rental across Chongqing at RMB83.1 per sqm per month in 1Q2017. Chongqing Retail Market

In 1Q2017, there was no new supply of retail malls in the quarter. The prime retail malls performance continued to improve with a drop in vacancy rate by dropped 0.8 percentage points to 10.3% in 1Q2017. In the quarter, international retailers continued their expansion in the city alongside Chinese F&B players particularly those serving specialty cuisines from Xinjiang and Mongolian. With the revolution of e-commerce and the rise of digital technologies reshaping the retail market, retail malls are placing more emphasis on customer experiences. Chongqing Residential Market

Chongqing's residential market remained active in 1Q2017 with a total of 2,110 high-end units mainly concentrated in Nan'an and Yubei launched in 1Q2017. This is an increase of 277.5% Y-o-Y. Beijing Market

Due to cooling measures such as tightening of pre-sales certification issuance introduced by Beijing government in September 2016, only 17 residential projects received pre-sales certification in 1Q2017. As such, new supply for the mass market segment declined by 51.7% Y-o-Y and there was no new high-end residential project launched in 1Q2017 respectively. Despite the curbs, demand for high-end residential projects rebounded in March 2017 following two months of muted demand with the transaction volume increased by 47.0% Y-o-Y to 682 units in 1Q2017.

In March 2017, the Beijing government rolled out new property cooling measures in response to continue surge in home prices and sales. The new cooling measures, in particular, restrict upgrade demand as the minimum down payment for a second home purchase increased from 50% to 60% (mass market property) and 70% to 80% (non-mass market property) In addition, the maximum mortgage term has also been shortened to 25 years from 30 years for second home purchases.
